

Your door system is worth something to us!

QUALITY WITH SUSTAINABLE EFFECTS!

## Modernisation solutions by GEZE Switzerland for all existing automatic door systems

We buy your old system and get your doors back on track with our upgrade solutions.

Many of the automatic doors in Switzerland have been in everyday use for at least 20 years. Renewal is inevitable after such a long time, even if their quality and functioning are apparently still top level. Some technologies are now out of date or spare parts are not available, so safety in compliance with standards can no longer be guaranteed.

Bring your doors bang up-to-date with our modernisation solutions, and all at a moderate, minimal cost. All possible door systems can be retrofitted.

### BENEFITS/USES/PROFIT

- one single point of contact for everything
- buyback and disposal of your old system
- 2-year warranty
- the right modernisation solution for every door situation
- lower costs compared to a completely new system
- no visible changes to doors
- forward-thinking technology for perfect operation
- doors meet current standards in accordance with EN16005
- guaranteed supply of spare parts
- lower maintenance costs

## GEZE SLIMDRIVE

Reduction and perfection go hand-in-hand. GEZE offers a complete range of automatic door drives in a "7 cm design", type-approved and certified in accordance with DIN 18650.

## GEZE ECDRIVE

The quiet linear sliding door drive for numerous motion cycles with constantly high access convenience and safety.

## GEZE POWERDRIVE

Power, convenience, safety, design and diverse variations for a wide range of needs and large and highly frequented entrance areas.

### The following components are included in the exchange of sliding door drives:

- drive complete with casing, track, roller carriage, motor, rechargeable battery, lock
- 2 infrared/radar release devices (combined detector)
- display programme switch
- choice of RAL colours
- assembly, dismantling and disposal of old system

Door leaves and side panels (if present) remain unchanged.

#### Options:

- Bowden cable
- safety sensors
- escape route solutions
- etc.

## GEZE POWERTURN

The Powerturn automatic swing door drive has the ability to open large heavy doors reliably and safely. At the same time, its low overall height sits perfectly with any design.

### The following components are included in the exchange of swing door drives:

- Powerturn or Powerturn F, with cover
- GC342 laser scanner
- assembly/dismantling and disposal of old system

Door leaves remain unchanged.

#### Options:

- display programme switch
- activation devices
- etc.
